| 73  | Evansville  | 15-Apr-94        | 8:05 AM  | Thunderstorm Winds | 0                 | 0         | 0          | 500                         | Trees and power lines were blown down and the roofs were blown from two homes on the west side of Evansville. Two construction site trailers were blown over on Green River Road on Evansville's east side.   | Evansville - Vanderburgh County Community Comprehensive Hazard Analysis |
| 74  | Evansville  | 16-Jun-94        | 2:40 PM  | Thunderstorm Winds | 0                 | 0         | 0          | 50                          | Six 70-foot tall utility poles were blown over on Evansville's east side. One of the poles fell on a 12-unit apartment building resulting in the evacuation of occupants. Randolph County Winchester, 16,1751EST., 0,0,0,0, Thunderstorm Winds (Several large trees were downed).   | Evansville - Vanderburgh County Community Comprehensive Hazard Analysis |
| 75  | Evansville  | 19-Jun-94        | 2:25 PM  | Thunderstorm Winds | 0                 | 0         | 0          | 500                         | Numerous trees and utility poles were blown down on Evansville's north side. Several homes and automobiles were damaged. Electrical power was not restored for up to 12 hours in some locations.  | Evansville - Vanderburgh County Community Comprehensive Hazard Analysis |
| 76  | Statewide   | 21-Nov-94        | 0:00     | High Wind          | 0                 | 0         | 0          | 50                          | An intense low pressure system over the Great Lakes and its associated cold front produced high winds across all of Indiana. Winds in excess of 50 mph were common across the state beginning near midnight in western Indiana. High winds spread to eastern Indiana by noon EST. Scattered power outages [and] downed trees were reported across many parts of Indiana including the South Bend, Lafayette, Indianapolis areas as well as rural areas northeast of Evansville. | Evansville - Vanderburgh County Community Comprehensive Hazard Analysis |
| 77  | Statewide   | 27-Nov-94        | 12:00 PM | High Wind          | 0                 | 0         | 0          | 120                         | An intense low pressure area and its associated cold front swept across the region with high winds both before and after the cold front. The cold front itself triggered a squall line that produced damage. The high winds resulted in a roof collapse at the ATF automotive business in Indianapolis around 2 PM EST. Also, a church steeple was damaged late Sunday evening on Indianapolis' eastside.   | Evansville - Vanderburgh County Community Comprehensive Hazard Analysis |
| 78  | Evansville  | 08-Jun-95        | 10:00 PM | Thunderstorm Winds | 52                | 0         | 0          | 5                           | Prime example of the damage that straight line winds can cause to not only structures, but infrastructure as well.  | Evansville - Vanderburgh County Community Comprehensive Hazard Analysis |
| 79  | St. Wendells  | 22-Oct-96        | 3:15 PM  | Thunderstorm Winds | 50                | 0         | 0          | 2                           | Trees and wires were down.  | Evansville - Vanderburgh County Community Comprehensive Hazard Analysis |

| 81  | Southwest Corner of Indiana Gibson, Pike, Posey, Spencer, Vanderburgh, and Warrick Counties | 30-Apr-97        | 1:00 PM  | High Wind          | 52                | 0         | 0          | 5                           | Isolated trees were blown down.   | Evansville - Vanderburgh County Community Comprehensive Hazard Analysis |
| 82  | Evansville  | 30-Apr-97        | 6:40 PM  | Thunderstorm Winds | 0                 | 0         | 0          | 4                           | Strong southwest winds, not related to thunderstorms, gusted between 50 and 60 MPH on hilltops and southwest-facing exposures. At the Evansville Airport, the highest gust was near 45 MPH during the late afternoon. Power lines were blown down near Petersburg in Pike County around 4 P.M.  | National Climatic Data Center   |
| 83  | Evansville  | 14-Jul-97        | 5:30 PM  | Thunderstorm Winds | 52                | 0         | 0          | 50                          | Trees and power lines were down on the west side of Evansville.   | National Climatic Data Center   |
| 84  | Evansville  | 07-May-98        | 12:20 AM | Thunderstorm Winds | 50                | 0         | 0          | 2                           | Large trees and power lines were down. About 10,000 Evansville homes were without power due to trees falling on power lines. At least two homes and a van were damaged by falling trees. An elderly woman was briefly trapped in her home after a tree fell on it.  | National Climatic Data Center   |
| 85  | Evansville  | 20-May-98        | 12:59 PM | Thunderstorm Winds | 0                 | 0         | 0          | 100                         | Power lines were downed by thunderstorm winds. A roof was blown off an industrial building on Diamond Avenue. Debris was scattered across First Avenue, which disrupted traffic. Trees and wires were blown down. About 3,000 Vanderburgh County electric customers were still without power a few hours later.   | National Climatic Data Center   |

Thunderstorms - 1

| No. | Location  | Historical Event | Time     | Type                | Magnitude (knots) | Death (#) | Injury (#) | Property Damage (in \$1000) | Comment  | Source of Information   |
|-----|---|------------------|----------|---------------------|-------------------|-----------|------------|-----------------------------|--|---|
| 86  | Evansville  | 23-May-98        | 9:25 PM  | Thunderstorm Winds  | 52                | 0         | 0          | 0                           | A few small trees were blown down in Evansville.   |   |
| 87  | Evansville  | 14-Jun-98        | 6:22 PM  | Thunderstorm Winds  | 50                | 0         | 0          | 3                           | Several trees were blown down in Evansville. Emergency management officials reported wind gusts to 58 MPH just east of Evansville near the Warrick County line.  |   |
| 88  | Evansville  | 22-Jun-98        | 11:15 PM | Thunderstorm Winds  | 52                | 0         | 0          | 5                           | A tree was down, along with numerous limbs and power lines.  |   |
| 89  | Vanderburgh County  | 10-Nov-98        | 6:00 AM  | High Wind           | 52                | 0         | 0          | 3                           | An intense low pressure system over the central Plains states was responsible for strong south winds ahead of an approaching cold front. At McCutchanville, several trees were blown down by gusts unofficially measured at 60 MPH. Tree limbs were down near Princeton and New Harmony. Average peak wind gusts across the region were around 50 MPH outside of thunderstorms.  |   |
| 90  | Evansville  | 10-Nov-98        | 8:57 AM  | Thunderstorm Winds  | 52                | 0         | 0          | 18                          | Thunderstorm winds gusted to 60 MPH at McCutchanville, and 48 MPH at the Evansville Airport. Some trees and utility poles were knocked down, blocking a few roadways. A falling tree and utility pole landed on a mobile home in Evansville, causing significant damage. The mobile home was unoccupied at the time.   |   |
| 91  | Southwest Corner of Indiana Gibson, Pike, Posey, Spencer, Vanderburgh, and Warrick Counties | 07-Feb-99        | 3:30 AM  | Strong Winds        | 0                 | 0         | 0          | 0                           | Strong winds ahead of an approaching cold front gusted to between 50 and 55 MPH at times. There were some tree limbs and a few weaker, older trees that blew down.   | National Climatic Data Center NCDC / Climate Resources / Climate Data / Events / Storm Events <a href="http://www4.ncdc.noaa.gov/cgi-win/wcgl.dll?wwevent-storms">http://www4.ncdc.noaa.gov/cgi-win/wcgl.dll?wwevent-storms</a> |
| 92  | Evansville  | 27-Feb-99        | 3:58 PM  | Thunderstorm Winds  | 75                | 0         | 0          | 200                         | Numerous trees and power lines were down in and around Evansville. Wind speeds were measured to 75 MPH at a television station in Evansville. A few microbursts with estimated wind speeds between 80 and 90 MPH occurred in and near Evansville. Two of the most intense microbursts were on the northwest side of Evansville and the east side of Evansville. On the northwest side, shingles were off roofs, some 2 by 4's were blown through a car windshield, and large storage buildings were damaged. This damage path was 1 to 2 miles long and 300 yards wide. Elsewhere in the county, in the McCutchanville area, large doors of a building were shoved in. About 3 miles north of Daylight on Interstate 164, a tractor trailer was overturned. Just east of Evansville, near the junction of Interstate 164 and Route 62, two power poles were downed, and three houses sustained significant roof damage. A light commercial structure that was under construction was blown down. |   |
| 93  | Evansville  | 05-May-99        | 4:52 PM  | Thunderstorm Winds  | 52                | 0         | 0          | 0                           | A storm spotter reported a wind gust of 60 MPH and pea size hail.  |   |
| 94  | Evansville Airport  | 05-May-99        | 5:10 PM  | Thunderstorm Winds  | 59                | 0         | 0          | 5                           | The automated observing system at the Evansville Airport measured a wind gust to 68 MPH. Tree limbs were down in Stacer.   |   |
| 95  | Evansville  | 17-May-99        | 4:10 PM  | Thunderstorm Winds  | 59                | 0         | 0          | 10                          | Wind gusts estimated between 65 and 70 MPH blew down power lines along U.S. 41. Trees were down in the vicinity of WIKY radio. Gusts were near 60 MPH in McCutchanville.   |   |
| 96  | Darmstadt   | 17-May-99        | 7:30 PM  | Straight Line Winds | 70 mph            | 0         | 0          | 3                           | On May 17, 1999, straight line winds gusted up to 70+ mph. This storm snapped powerlines and trees. A tractor-trailer was overturned during this storm.  | Evansville - Vanderburgh County Community Comprehensive Hazard Analysis   |
| 97  | Darmstadt   | 04-Jun-99        | 7:30 PM  | Thunderstorm Winds  | 60                | 0         | 0          | 3                           | Power lines were down at Darmstadt. Gusts from 60 to 70 MPH were reported just north of Roberts Stadium in Evansville.   |   |
| 98  | Evansville  | 04-Jun-99        | 8:08 PM  | Thunderstorm Winds  | 50                | 0         | 0          | 3                           | Numerous power lines were down.  |   |
| 99  | Stacer  | 06-Jun-99        | 4:20 PM  | Thunderstorm Winds  | 53                | 0         | 0          | 0                           | A thunderstorm wind gust was measured between 60 and 65 MPH near the Gibson County line.   | National Climatic Data Center   |
| 100 | Evansville  | 03-Jan-00        | 11:10 AM | Thunderstorm Winds  | 50                | 0         | 0          | 2                           | Trees were down.   |   |
| 101 | Evansville  | 03-Jan-00        | 11:58 AM | Thunderstorm Winds  | 50                | 0         | 0          | 5                           | Trees were down in downtown Evansville.  | NCDC / Climate Resources / Climate Data / Events / Storm Events <a href="http://www4.ncdc.noaa.gov/cgi-win/wcgl.dll?wwevent-storms">http://www4.ncdc.noaa.gov/cgi-win/wcgl.dll?wwevent-storms</a>                               |
| 101 | Evansville  | 03-Jan-00        | 12:10 PM | Thunderstorm Winds  | 65                | 0         | 0          | 100                         | Thunderstorm winds caused extensive damage in a small area, covering approximately a four square block area on the east side of Evansville. About 25 homes were damaged. Most of the damage was due to trees being blown onto roofs. Five homes had to be abandoned due to severe roof damage. Damage to the remainder of the homes was mainly light. A vehicle was damaged by wind-blown fencing. About 30 trees were down.   |   |
| 102 | Southwest Corner of Indiana Gibson, Pike, Posey, Spencer, Vanderburgh, and Warrick Counties | 20-Apr-00        | 12:45 PM | Wind                | 0                 | 0         | 0          | 0                           | On January 3rd, 2000, a downburst affected a four block area in the vicinity of Kentucky and Lincoln Avenues. Twenty five homes sustained damage, of these, 5 were uninhabitable until repairs were made.  | Evansville - Vanderburgh County Community Comprehensive Hazard Analysis   |
| 103 | Evansville  | 12-May-00        | 10:18 PM | Thunderstorm Winds  | 70                | 0         | 0          | 100                         | Strong gusty west winds in the wake of a cold front caused a few trees and power lines to come down. The peak gusts were measured around 50 MPH. The highest gust at Evansville was 49 MPH.  |   |
| 104 | Evansville  | 12-May-00        | 10:18 PM | Thunderstorm Winds  | 70                | 0         | 0          | 100                         | Damaging thunderstorm winds affected the west side of Evansville. The hardest hit neighborhood was just off Route 62 about 2 miles west of the Evansville city limits. The main damage was done to an elementary school, which lost a large section of roof. A large tree toppled through a classroom. There was water damage inside the school, and a cinder-block baseball dugout was destroyed. Other damage included many large limbs blown down and privacy fences down. The back deck of a house near the school was heavily damaged. Another nearby house lost part of its roof. About 5,000 electric customers were without power because of fallen tree limbs and utility poles. In the city of Evansville, on the west side of downtown, a few businesses along West Franklin Street received siding and window damage. Trees were blown down in Wesselman Woods Nature Preserve and at the West Side Branch Library.  |   |
| 104 | Inglefield  | 12-May-00        | 10:25 PM | Thunderstorm Winds  | 0                 | 0         | 0          | 100                         | A thunderstorm microburst damaged a residence in the northeast corner of the county, just off U.S. Route 57. Windows were blown out of a garage, and large trees and limbs were down.  |   |
| 105 | Evansville  | 23-May-00        | 6:32 PM  | Thunderstorm Winds  | 56                | 0         | 0          | 0                           | Winds were estimated between 60 and 70 MPH on the east side of Evansville.   |   |
| 106 | Evansville  | 14-Jun-00        | 5:44 PM  | Thunderstorm Winds  | 52                | 0         | 0          | 8                           | A couple of trees were down near the Posey County line. Winds were estimated near 60 MPH at McCutchanville. Trees were blown down at the Whirlpool manufacturing plant.  | National Climatic Data Center   |
| 107 | Evansville  | 27-Aug-00        | 1:00 AM  | Thunderstorm Winds  | 0                 | 0         | 0          | 25                          | Numerous trees were down at the Vanderburgh 4-H Fairgrounds. Elsewhere in the county, several trees were down on power lines, and one tree fell onto a house.  | NCDC / Climate Resources / Climate Data / Events / Storm Events <a href="http://www4.ncdc.noaa.gov/cgi-win/wcgl.dll?wwevent-storms">http://www4.ncdc.noaa.gov/cgi-win/wcgl.dll?wwevent-storms</a>                               |
| 108 | Evansville  | 09-Nov-00        | 11:48 AM | Thunderstorm Winds  | 0                 | 0         | 0          | 20                          | Strong winds tore off a 100 by 30-foot section of roof from a supply company. The roof damage allowed rain to leak into the building, causing further damage. Some bricks were knocked off a nearby building, and metal siding along the top of the building was ripped away. Debris fell in a nearby parking lot. The damage was near the intersection of U.S. Highway 41 and the Lloyd Expressway.   |   |
| 109 | Evansville  | 09-Nov-00        | 12:01 PM | Thunderstorm Winds  | 54                | 0         | 0          | 5                           | A spotter estimated wind gusts between 65 and 70 MPH on the southeast side of Evansville, along the Ohio River. Trees and power lines were down near Highway 57 and Kansas Road, a few miles northeast of Evansville.  |   |
| 110 | Southwest Corner of Indiana Gibson, Pike, Posey, Spencer, Vanderburgh, and Warrick Counties | 11-Dec-00        | 6:00 PM  | Wind                | 0                 | 0         | 0          | 0                           | A strong cold front passed through southwest Indiana. Strong gusty northwest winds in the wake of the front caused some minor damage to trees. A few trees were down in each county. At the Evansville Airport, the peak wind gust was clocked at 46 MPH.  |   |
| 111 | Evansville  | 20-Jun-01        | 7:30 PM  | Thunderstorm Winds  | 52                | 0         | 0          | 7                           | Near Diamond Avenue, about a dozen trees were down, including two that fell on houses.   |   |
| 112 | Evansville  | 23-Oct-01        | 12:45 PM | Thunderstorm Winds  | 50                | 0         | 0          | 3                           | A few trees and wires were down on the east side of Evansville. The trees were 6 to 8 inches in diameter.  |   |
| 113 | Evansville  | 24-Oct-01        | 3:48 PM  | Thunderstorm Winds  | 50                | 0         | 0          | 3                           | A couple of trees were blown down in the county. One tree fell through a house on the east side of Evansville.   | Historical Climate Data - Midwest Regional Climactic Center <a href="http://mcc.sws.uiuc.edu/html/historical/Oct2401SvrWx.htm">http://mcc.sws.uiuc.edu/html/historical/Oct2401SvrWx.htm</a>                                     |
